

THE TRIPOD™ BEATING HEART STABILIZATION SYSTEM*

Easy to Use and Clinically Flexible

The TRIPOD Beating Heart System combines ease of use with a rock solid, metal articulating arm and ultra-low profile foot pads. The strength and flexibility of the metal articulating arm delivers superior access and stabilization even to the most challenging anastomotic locations.

TRIPOD Features

- *Ease of use*
- *Superior arm strength and stability*
- *Low profile design*
- *Optional atraumatic vessel occlusion*

TRIPOD™ SYSTEM, FEATURING SURTRED LOW PROFILE FOOT PADS

The TRIPOD Beating Heart Stabilizing System combines the properties of a flexible plastic arm with the strength of stainless steel. The combination of a rock solid articulating arm and low profile foot pads provides the surgeon with a system that is both easy to use and clinically flexible.

TRIPOD Stabilizer

- Articulating metal stabilization arm
- One step mounting to sternal retractor
- Single knob for easy adjustment of positioning arm

NYLON
TEXTURE

SurTred

- Low profile foot pads available in:
 - Nylon texture
 - Light metal texture
 - Medium metal texture
- Optimal access to anastomotic site
- Greater stabilization on difficult lateral and posterior vessels

LIGHT
METAL
TEXTURE

FasTract Sternal Retractor

- Low profile rail system
- 3-sided mounting
- Ideal for on and off pump procedures

ORDERING INFORMATION

CODE	DESCRIPTION	UNITS PER CARTON
STB-30C2S	TRIPOD with SurTred medium metal texture foot pads and FasTract Mount	1
STB-30C4S	TRIPOD with SurTred nylon texture foot pads and FasTract Mount	1
STB-30C6S	TRIPOD with SurTred light metal texture foot pads and FasTract Mount	1
RTC-1000	FasTract Retractor - Reusable	1
RTC-1020S	FasTract Suture Stays	5 Pairs
